

I have only filled in an Ice Prep Schedule for this coming week - trying to see how it works with some new twists such as we have doubles starting at 4:30 On Wednesdays and 2 draws on Thursday nights. For doubles we will only prep ice once for the first draw each Wednesday and they only plan to use 3 sheets for their first draw. On Thursday nights with 2 draws the second draw will be assigned to anyone who is playing late but this week we are all early draw so we will just have to do the pebble nip by whoever finishes their game first.

As in the past if you cant make your assignment its up to you to find a replacement. I will put out more info on the ice duties this week - we will have a training session on the new hacks and pebbling recommendations in the next week or so. For now when pebbling for a draw just apply pebble using the XF head and we are recommending nipping before you pebble to clean the ice, then pebbling and then nipping.

Let me know if you have any questions, Chris
